

A Vision for Clean Water

Project Implementation for the Biosand Filter Workshop

This four day workshop will offer instruction and hands-on experience for participants in the construction of all components of the filter, including concrete containers, sand media, diffuser basins and lids. Participants will gain a clear understanding of the rationale behind the filter design, how to install it and how to instruct householders on its correct usage.

The workshop also explores the relationship between water and health in developing countries. Participants will gain a fundamental overview of water quality, hygiene, sanitation, disease transmission, household water treatment options, and safe water storage. As well, participants will discover how to successfully plan and implement a biosand filter project.

DATE: **September 15 –18, 2009**
COST: **\$500**
PLACE: **Detroit, MI Area**
TIME: **8:00 AM to 5:00 PM**
